

Oscar Meca graduated in Biochemistry (2008, Autonomous University of Barcelona, Spain), and currently works as a Regulatory Affairs Officer at DDR (Drug Development and Regulation - www.ddrmedic.com), located in Barcelona, Amsterdam and London.

He has wide experience as a biomedical researcher and obtained his PhD in Biomedicine in 2014 (Universitat de Barcelona, Spain). The focus during his scientific career has mainly been the study of cancer from different perspectives -moving from basic research to translational approaches for developing novel anti-tumorigenic molecules, biomaterials and stem cell therapy-based treatments for a variety of tumor types *In Vivo*-.

He has also studied an MBA in the Pharmaceutical and Biotech industry (ESAME Barcelona, 2020) and worked as Medical Affairs Specialist at Amgen in the cardiovascular area.
